SUMARRY

To obtain a challenging position in a reputable organization where I can utilize my technical, analytical, and problem-solving skills to contribute to the company's growth and enhance my knowledge in the field of computer science.

EDUCATION

Master of Computer Application, Noida Institute of Engineering and Technology	July 2025
Bachelor of Computer Application, I.P Degree College, Bulandshahr	July 2023
Intermediate, Sunrise Global School, Bulandshahr	July 2020
High School, Sunrise Public School Bulandshahr	May 2018

SKILLS

- Programming Language: C#.Net
- Scripting Language: HTML, CSS, JavaScript, J Query
- Web Technology: ASP.Net, ASP.Net MVC
- Database Technology: Ado.Net, Entity Framework
- Database: SQL
- Tools: Visual Studio, SQL Server Management Studio

TRAINING/INTERNSHIP EXPERIENCE

Data Science Intern — Hunar Intern
Feb 2025 – May 2025

- Worked on data cleaning, analysis, visualization, and machine learning model development.
- Implemented sampling techniques for imbalanced datasets and applied multiple ML algorithms.
- Completed projects including Credit Card Fraud Detection and House Price Prediction with strong evaluation metrics.

AI/ML Intern — InternsElite
June 2025 – August 2025

- Worked on AI/ML model development using Python and Scikit-learn.
- Performed data preprocessing, feature engineering, and model evaluation.
- Completed end-to-end ML tasks on real datasets.

Professional Training – ASP.NET
ASP.NET Developer Trainee | 6 Months
Mentor: Alok Kumar Shrivastav
Technologies: ASP.NET, C#, ADO.NET, SQL Server

- Completed 6 months of hands-on ASP.NET training
- Developed web applications using ASP.NET & C#
- Worked with SQL Server for database operations

PROJECT

- **Credit Card Fraud Detection (Machine Learning):**
  Built a fraud detection model using Python (Pandas, NumPy, Scikit-learn, XGBoost); handled imbalanced data with SMOTE/ADASYN/oversampling and achieved ~98.15% ROC-AUC using XGBoost.

- **House Price Prediction Model:**
  Developed a regression model with feature engineering, data preprocessing, and model evaluation to accurately predict house prices using Python ML libraries.

- **Breast Cancer Prediction Model:**
  Created a classification model to distinguish between malignant and benign tumors through data cleaning, feature selection, model building, and performance evaluation.

CERTIFICATION

- TechTantra (The Coding Challenge)
- Next Gen Technology (AI)
- Linux Command Line for Beginners
- Introduction to Python
- Design Thinking for Innovation
- British Council English Score

PERSONAL INFO

- Hobbies: Reading Books, Travelling, Listening Music, Playing Volleyball
- Strength: Good listener, Quick learner, Teamwork, Problem Solving, Time management
